NeckScape Care & Grooming

Hold the NeckScape by the knot. Run your hand down each side to smooth it out.

Use fingers to gently comb out any tangles.

Wear your NeckScape with the strands loose or looped around your neck as many times as desired (two or three loops recommended).

If you would like a neater, tighter look, twist the knot in one direction until the strands tighten into a rope.

Loop around neck as desired.

Lint Happens: Lint from the cutting process is removed as much as possible by me during washing & felting. Any residual fuzz is normal and will dissipate shortly.

Storage: It is recommended to store your NeckScape on a hanger in your closet. This will prevent tangling.

Cleaning: Do not throw your NeckScape in the washer & dryer!
It will not go well

To clean, I recommend holding it by the knot and dunking in a sink of hot, soapy water. Gently squeeze out the water and hang to dry.
